vasculogenesis involved in coronary vascular morphogenesis
vascular endothelial growth factor production
coronary artery morphogenesis
blood vessel endothelial cell differentiation
regulation of endothelial cell development
regulation of establishment of endothelial barrier
endothelial cell activation
kidney vasculature morphogenesis
renal system vasculature morphogenesis
coronary vasculature morphogenesis
vascular endothelial growth factor signaling pathway
regulation of endothelial cell differentiation
endothelial tube morphogenesis
kidney vasculature development
morphogenesis of an endothelium
renal system vasculature development
cellular response to vascular endothelial growth factor stimulus
regulation of cell migration involved in sprouting angiogenesis
regulation of blood vessel endothelial cell migration
glomerulus vasculature development
regulation of vascular endothelial growth factor production
regulation of vascular endothelial cell proliferation
cell migration involved in sprouting angiogenesis
placenta blood vessel development
vasculogenesis
blood vessel endothelial cell migration
branching involved in blood vessel morphogenesis
regulation of morphogenesis of a branching structure
regulation of endothelial cell migration
regulation of endothelial cell apoptotic process
